SOCIO- POLITICAL SURVEY

JUNE 2023

Republic of Moldova

This document has been produced with the financial support of the European Union. Its contents are the sole responsibility of the WatchDog.MD Community and can under no circumstances be regarded as reflecting the position of the European Union.

Research methodology

- ✓ **Sample size:** 1121 persons aged 18 and over;
- ✓ **Sample:** stratified, probabalistic, bistadial;
- ✓ **Survey type:** telephone interview moderated by interviewer (CATI)
- ✓ **Representativeness:** the sample is representative of the adult population of the Republic of Moldova, with a maximum error of +3.1%.
- ✓ **Data collection period:** 10 – 19 June 2023. The questionnaire was available in Romanian and Russian and respondents were given a choice of language.

Following the analysis of the sample structure obtained, it was found that the population distribution known from the available statistical data was consistent with that obtained, within the limits of the admissible statistical deviation. There was a difference in the gender structure, with an over-representation of females, and in the age groups, with an under-representation of young people (18-29 years). The main cause of these deviations is the phenomenon of labour migration abroad.

*To correct for this, the results were weighted so that the structure of the sample taken into account represents the average of the distributions recorded in official statistics and that obtained in the field. Thus, **the results presented are weighted**. The difference between weighted and unweighted results does not exceed 1.5% for any of the questions.*

In your opinion...

Do you think that Moldova's neutrality status can protect us from the danger of foreign military aggression?

The recent elections of the leader (Bashkan) of Gagauzia region were corrupted by the Shor party

Maia Sandu said that Russia is behind the protests organised by the Shor party. Do you think this is true?
